PROJECTS

[My github Profile ↗](#)

Aug 2024 - Present

This is a Todo Application built using React.js. In this project, users can add, delete, and manage their daily tasks easily. I used React Hooks (useState) to manage the application state and implemented local storage to save tasks even after refreshing the page. The main purpose of this project was to strengthen my understanding of React fundamentals and state management.

Technologies Used: React.js, JavaScript, CSS, Local Storage
